Charter Aircraft of the Month – The Airbus H155 Eurocopter

The Airbus twin-engine H155 (formerly known as the Eurocopter EC155) is a long-range medium-lift passenger transport helicopter with an endurance of up to 2hrs. Designed for a wide range of missions from private and business to emergency medical services and law enforcement operations, the EC155 is flown by 70-plus operators in more than 30 countries.

This helicopter's Spheriflex® main rotor head delivers a smooth ride – even at high speed – along with excellent handling qualities and in-flight stability. The H155 also benefits from a low sound signature and low maintenance.

The H155 is equipped with two Safran Arriel 2C2 turbine engines fitted with dual channel full authority digital engine controls for fully automated one engine inoperative (OEI) safety.

Thanks to its significant power, the H155 has a long flight range as well as the fastest cruising speed in its class. The H155 offers a full-glass cockpit with large liquid crystal display screens, which reduce pilot workload, improve safety, and facilitate maintenance. Two Garmin GTN 750 touchscreens are installed in the centre console, enhancing situational awareness and connectivity.

/ Maximum Passengers: 6

/ Baggage: 6 small bags

/ Maximum Range: 340nm
