James Garfield-Davies – Commercial Director

James Garfield-Davies is a lifelong aviation professional.

James also has a background in Banking and has served as an Army Officer in the Territorial Army. His aviation career began with him flying commercially operated Airbus A320 aircraft, before transferring to the Business/Corporate and Private side of aviation, initially flying a privately operated A319 Airbus Corporate Jet.

Hugely experienced in working with Middle Eastern clients, James has also flown the Falcon 900EX Classic, the Challenger 604 and 605 and the ultra long range Global Express Vision aircraft. James has an eye for detail to Aviation Operations as well as the complex financial transactions within Consultancy Projects, aircraft sales and purchases.

Safe Private Jet and Turbo Prop Charter

Your safety is our highest priority. When you come to Sentinel Aviation you come to us because we are a company founded, managed and staffed by former business jet pilots. You pay for our experience and your safety and your peace of mind.

Safe Helicopter Charter

We have deep industry knowledge and experience of arranging helicopter charters through the best companies; and have provided helicopters for a wide range of clients – working with the best pilots and safest helicopter operators.

Aircraft Charter

Fractional Ownership

Fractional Ownership Programmes afford you the experience and advantages of aircraft ownership without the massive upfront capital requirements, responsibility of training and managing a pilot and operations crew. We help you find the right programme.

Block of Hours

An alternative to fractional ownership is the purchase of pre-paid hours for a private jet charter at an agreed price. This requires an upfront deposit is required, however it provides our clients with a fixed price for a private jet rental. Depending on your requirements, this approach can result in a lower private jet charter cost.

Lease Hours

Aircraft Lease programmes are another alternative to Fractional Ownership. Perfect for personal or business jet travellers who fly 50 or more hours per year, but with a different payment structure for those who do not want an initial capital outlay. We help you find the most manageable costs for the term of your private jet lease.

Private Jet Card

Jet Cards give you a highly personalised service for your private jet travel – fixed hourly rates, guaranteed availability, and preferred booking terms every time you fly. With the right card, you can enjoy priority access to the programme of your choice.

Travel with Shotguns & Firearms

You're a responsible gun owner, but you're not sure if you can bring your firearm on your next private jet charter flight? Since BREXIT travel with shotguns and firearms has become more problematic. Sentinel Aviation will work with you, your departure and arrival airports and your ultimate destination to ensure that travel is as smooth as possible.

Travelling with Pets

Flying with pets on commercial airlines is a huge hassle. Flying with pets on private jets is the perfect solution for those who want to ensure their pet's safety and comfort while travelling. With private jet companies allowing pets on board, there's no need to worry about breaking any rules or regulations – just sit back, relax, and enjoy the flight!

Private Jet Purchase

The cost of buying and maintaining a jet can be prohibitive. Ongoing expenses may include flight crew salaries and expenses, the costs of routine maintenance and unforeseen repairs, hangar rental, and aircraft insurance. Leasing a used private jet is an option and alternatives include private jet charter services, fractional jet ownership, membership of a private jet club and purchasing a block of hours. We'll help you find the right solution.

Private Jet Finance

The cost of purchasing a private jet outright varies greatly, from under \$500,000 (€447,000/ £385,000) up to \$90m (€80.5m/ £69m). We use our Independent Aviation Finance advisers to find you the perfect solution for you. Details of income, assets and liabilities will enable them to prepare a credit proposal to approach interested lenders. Their goal is to achieve the highest loan to value at the lowest margin.

Aircraft Management

Private Jet Operations

While many aircraft management companies may offer similar services, our job is to find the right company to properly manage and support your aviation asset, avoiding unpleasant surprises after the management agreement is signed.

Private Jet Insurance

Jet owners need to know that their aircraft is properly insured. As an independent aviation consultancy Sentinel Aviation only works with the best and most financially secure insurance companies – and our experience means that we can provide you with an exceptional service.

Private Jet Management Account Auditing

Our Account Auditing services are affordable and will have a significant impact on your bottom line – giving you the peace of mind you deserve. We get paid based on a percentage of the value of the errors that we identify. We are confident, if there is a major error, we will find it. If you charter, we can also identify ways to make it more profitable.

Private Jet Maintenance

Maintaining your jet can be expensive if you don't have the proper knowledge of what needs to be done, and when. By following a set schedule of maintenance requirements you can ensure that your investment is well taken care of. We will always present you with a proactive planned maintenance schedule so that you know when and where you can expect your aircraft to be available.

Aircraft Management

Private Jet Crewing

Hiring the right pilots, flight attendants and engineers for your aircraft can be a difficult and time-consuming process. Sentinel Aviation has a rigorous vetting process that includes interviews with existing pilots, staff, and other industry contacts. We have a preferred list of qualified pilots so that you can find the best fit quickly and easily.

Private Jet Import & Export

Buying or selling an aircraft can be a complicated process, especially when it comes to the export and import of the aircraft. Our goal is to turn this into a seamless process and get you flying as soon as possible.
